

## WHS Risk Assessment

Item 2 of 4

Workplaces and classrooms may not always be safe. Things happen - it's important to take action when you identify hazards and risks within your teaching environment.

This involves:

- Identifying, monitoring, and addressing work health and safety (WHS) hazards and risks during the assessment process.

**Step 1.** Using the **WHS Risk Assessment** template, you are required to complete an assessment of your training environment listing any hazards or risks as per the following scenario.

### Risk Scenario

*On entering the training room this morning, you notice that the emergency exit door was blocked by a large stack of chairs. They had been placed there by external cleaners when the carpet was cleaned the night before.*

In your group, discuss what action you would take now as well as what you could do to prevent reoccurrences of this situation.

You are required to complete the Risk Assessment form.

Read the form carefully and ensure all fields are completed.

Upload the following completed document
