

## WHS Risk Assessment

Item 2 of 4

Workplaces and classrooms may not always be safe. Things happen - it's important to take action when you identify hazards and risks within your teaching environment.

This involves:

- Identifying, monitoring, and addressing work health and safety (WHS) hazards and risks during the assessment process.

**Step 1.** Using the **WHS Risk Assessment** template, you are required to complete an assessment of your training environment listing any hazards or risks as per the following scenario.

### Risk Scenario

*In the training room, participants often trip over power cords that snake across the floor due to limited outlets.*

*The mat near the entry also poses a tripping hazard, making it difficult for participants to move safely around the room.*

*These hazards have caused several near-miss incidents, and the risk of injury is high if not addressed.*

In your group, discuss what action you would take now as well as what you could do to prevent re-occurrences of this situation.

You are required to complete the WHS Risk Assessment form.

Read the form carefully and ensure all fields are completed.

Upload the following completed document

- WHS Risk Assessment form

If required, add a note or written response to accompany your submission

Each file uploaded can be no more than 1GB, uploaded files can be removed before submission
