

Reviewing your own compliance

Item 2 of 2

Once you have completed your **Industry Engagement Plan** it is important to seek feedback from relevant personnel. This includes talking with co-workers or the RTO Manager or the Compliance team, VET Consultants or other trainers and assessors.

You need to discuss your **plan** to ensure that your documentation covers the requirements for **Industry Engagement**. Make sure that the Standards or other relevant VET legislation have not changed.

You have now demonstrated your ability to work with several compliance requirements.

This includes completing your **Trainer Profile** in Project 2 and completing your **Industry Engagement Plan** in Project 4.

You now need to identify any changes required to **your own compliance practices**.

To help you document your reflection - answer the following questions.

Review and reflect on your compliance with relevant Standards for RTOs	
a) List the relevant personnel you have discussed your Industry Engagement Plan with.	<input type="text" value="Enter a response here"/>
b) Briefly outline the feedback that you have received including any suggested changes you should make to your Industry Engagement Plan .	<input type="text" value="Enter a response here"/>
c) Has there been any update to the Standards or other relevant VET legislation which will require you to change your Industry Engagement Plan ? (If YES - please provide details)	<input type="text" value="Enter a response here"/>
d) Thinking about your Industry Engagement Plan , list two (2) key factors that will ensure compliance with the Standards in the future.	<input type="text" value="Enter a response here"/>
e) In Project 2 - you completed a brainstorming activity to help you complete your Trainer Profile . Having an up to date Trainer Profile is one strategy used to meet the requirements of Trainers and Assessors in the Standards for RTOs . Thinking about the Trainer Profile and the Industry Engagement Plan - list any improvements you would make to either document or your work practices to ensure your own compliance practice in the future .	<input type="text" value="Enter a response here"/>
